Why create a Researcher profile?

If you are a researcher or job seeker, the researcher profile allows you to provide additional information on your research experience.

The more information provided, the better the chances of being found in the "Member Search" directory of the Partnering section by other EURAXESS members looking for collaboration and employers looking for qualified researchers.

If you wish to post job or funding offers, there is no need to create a Researcher profile - you just need an Organisation profile.

If you need a Researcher profile, click on the "Confirm" button.

Want to participate in Science4Refugees initiative?

You would need to flag YES for Science4Refugees only if you already have left your country of residence and have become asylum seeker/have applied for the refugee status in a country other than your country of residence, in order to highlight this fact. This is to provide complementary information to the recruiters with regards to your current status and place of residence. Otherwise, by posting your CV/creating your researcher profile at EURAXESS we hereby confirm that you already benefit from the same advantages as a researcher having fled his/her country:

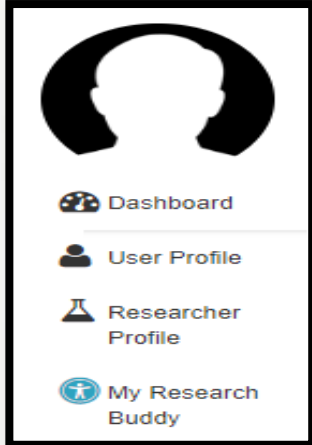

- your researcher profile/ CV is accessible to all the institutions looking for candidates in the EURAXESS database
- you can browse through the consistent collection of job and funding opportunities and apply to any of them regardless of whether they are flagged or not as Science4Refugees; once you have found the offer that you are interested in you will find more details about how to apply under the "WHERE TO APPLY" button, in the job description page.
